Mechanical and Plumbing Construction
Administration

PROJECT DESCRIPTION

The project involves approximately **23,745** square feet of building alterations and renovations.

The building alterations and renovations are based on exterior and interior improvements. The exterior improvements include a maintenance office with office space, restroom, kitchenette, and dressing spaces, field house upgrades, football field security system, ticket booth and press box upgrades with HVAC, and general football field improvements. The interior renovations include the replacement of the 14,283 s.f. of state of the art gymnasium floor to accommodate a total of 1,098 fans with 11 handicapped spaces. In addition, the gymnasium was equipped with two 80 ton air cooled units. The supporting male and female locker rooms were renovated to include 30 wood lockers as well as supporting weigh rooms. The project included new training room and weight equipment selection as well as general improvements such as the inclusion of restroom upgrades, ceiling replacement and painting.
